## DETAILED ACTION

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Regarding claims 1, 12, 17, Agrawal teaches an apparatus/method for delivering a voice mail message to a recipient, comprising:

a memory (col 5 lines 23-39); and

at least one processor, coupled to the memory, operative to (col 5 lines 24-39):

receive said voice mail message from a sender (col 6 lines 57-67, col 7 lines 1-2);

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. **Claims 9-10, 14-15**, are rejected under 35 U.S.C. 103(a) as being unpatentable over Agrawal (US Patent 7,447,495 B2) in view of Haim (US Patent 6,718,014)

Regarding claims 9, 14, Agrawal fails to teach a method/apparatus wherein said recipient can respond to said sender in real time. However, Haim teaches a method/apparatus wherein said recipient can respond to said sender in real time (col 4 lines 5-15, col 1 lines 8-14). Therefore, it would have been obvious to ordinary skill in the art at the time the invention was made to combine the above teaching of Haim with Agrawal modified, in order to notify the user of the incoming telephone call in response to the telecommunication interface intercepting the incoming telephone call prior to ringing of the incoming telephone call.

Regarding claims 10, 15, Agrawal fails to teach a method wherein said recipient can respond to said sender in non-real time. Haim teaches a method wherein said recipient can respond to said sender in non-real time (col 1 lines 8-14, col 4 lines 5-15). Therefore, it would have been obvious to ordinary skill in the art at the time the invention was made to combine the above teaching of Haim with Agrawal, in order to notify the user of the incoming telephone call in response to the telecommunication interface

intercepting the incoming telephone call prior to ringing of the incoming telephone call.
